

Cable Protection Mesh

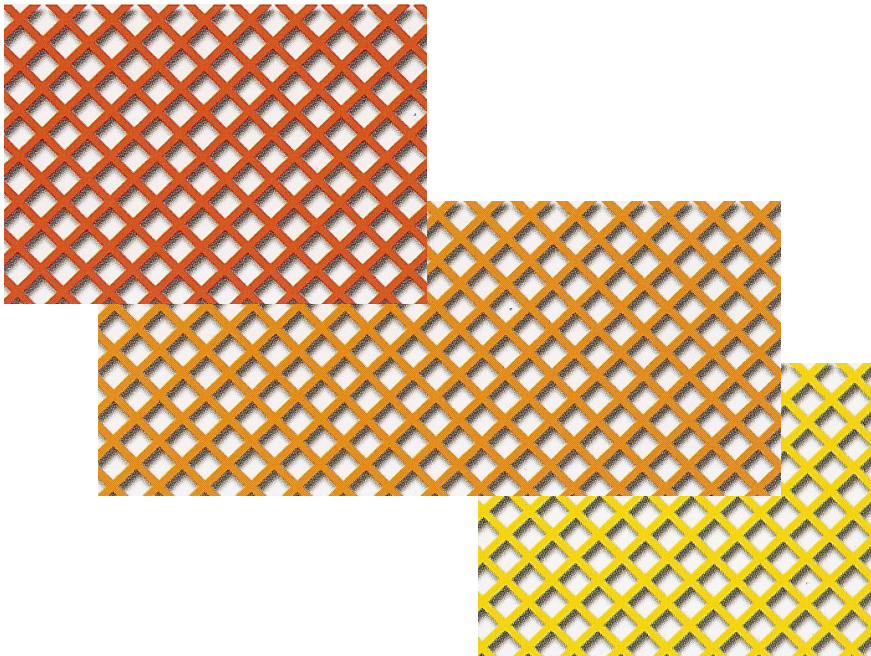

Optimal's Cable and Pipe Protection Mesh is an extruded plastic mesh to protect cables and pipes underground.

The high strength plastic mesh is supplied in roll form in lengths of 50 metres.

The Cable and Pipe Protection Mesh is highly visible and should be laid in the trench halfway between the pipe or cable and the surface of the backfill, and offers high impact resistance against future rogue excavations.

- High Impact resistance
- Each roll is bagged for protection
- Excellent chemical resistance

Our cable and pipe protection mesh can be laid in the trench and have an underground warning tape or detectable tape laid on top for added warning / identification of the pipe or cable below. This warning tape can be printed with a customised warning message and contact details.

Ordering Details

Standard Mesh	Colour	Part Number
600mm x 3mm x 50mts	Yellow	OPT-PROTECTMESH-600-YW
Other widths and colours on request, MOQ applies
