

Detectable Burial Tape

Optimal's detectable burial tape is a polyethylene underground warning tape incorporating one or two stainless steel tracer wires for the marking and location of buried pipes and cables. The detectable tracer tape can be used in conjunction with cable avoidance tools to locate the position of non-metallic pipes and un-energised cables.

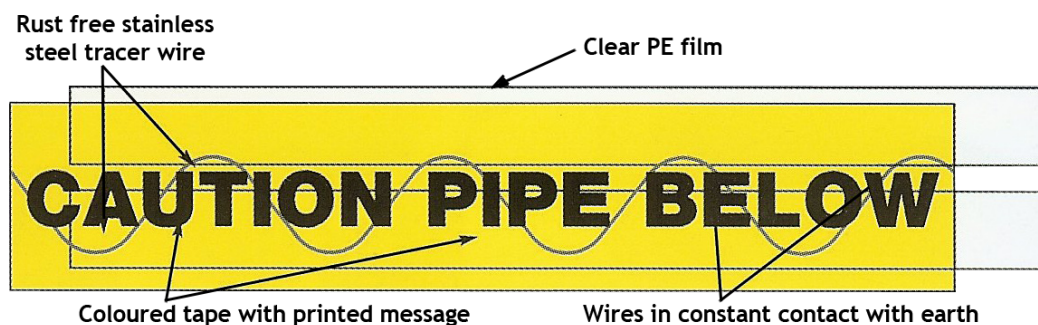

The detectable wires are laid in a sinusoidal pattern and laminated between two layers of low density lead free virgin grade rot resistant polyethylene ensuring that the tape and therefore the cable or pipeline beneath is detectable.

- 0.7mm AISI 316 grade stainless steel tracer wire
- Unique design allow the wires to stretch by over 25% before breaking
- Printed text & wires protected by a clear laminated film.
- Top layer of laminated film protects the printed warning message
- Stainless steel joining crimps & crimping tools are available
- Side Flanges supplied if required.

Optimal's detectable tape can be specially manufactured to customers' unique requirements and is available in various colours, texts and sizes and can be manufactured onto wooden cable drums up to 3kms.

Ordering Details

Message Style	Size / Colour	Part number
FIBRE OPTIC CABLE BELOW	100mm x 250m / White	OPT-DETECTTAPE-FO-250M
COMMUNICATIONS CABLE BELOW	100mm x 250m / White	OPT-DETECTTAPE-COMMS-250M
<i>Custom messages and lengths available - call for details</i>		
Crimping Pliers		OPT-DETECTTAPE-Crimper
Stainless Steel Crimp Sleeves (Pk 100)		OPT-DETECTTAPE-CrimpSleeves
