

Application

The OWL 4 series of optical fibre certification test kits are ideal for the fibre optic professional who requires standards-based certification of optic fibre links, including TIA-568, ISO 11801, various Ethernet standards plus others. The tester can also be configured with custom standards to meet the needs of various differing applications.

The test kit includes Power Meter and Light Source depending upon needs. A VFL is optional. Accessories include carrying case, protective rubber boots, NIST traceable certificate of calibration and a CD-ROM with reporting software

Features

- Certifies links to known standards
- Auto test - tests at 2 wavelengths
- Data Storage - 1000 data points
- Optional VFL
- Reporting Software gives formatted printed reports
- Loss Wizard to calculate maximum allowable losses
- Absolute or relative modes = instant pass/fail results
- Selectively view, delete or resample data points
